Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art is (a) JP 55-040835 (herein referred to as Asahi), JP51-04330A (herein referred to as Sumitomo) or JP 55-039329A (herein referred to as Asahi) in view of (b) JP 59174850A (Ricoh) and (c) JP-10298295A (Mitsui).

Each of the (a) references teaches a slip coating comprising an ethylene/alpha-beta ethylenically unsaturated carboxylic acid copolymer which is partially neutralized with a metal and/or ammonium ions. Mitsui teaches the melt flow (herein understood to be indicative of molecular weight) (0010) and pH (0012) of such copolymers should be optimized for processing purposes. Ricoh teaches such coatings may be applied to a paper substrate in amounts of 0.2-0.7g/sq. m.

The prior art fails to render the claimed invention obvious because the prior art fails to teach the claimed coating weight of the clear coated paper. Said coating weight was not obvious to a skilled artisan at the time the invention was made because the claimed coating weight is 20 times less than the lowest coating weight taught in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
